Secricom presented fast-deployable nomadic node on security workshop ASTER in Southern Poland.

Fast-deployable Nomadic Node represented by a van car with seamless connectivity and mobile server was showed for civil protection applications.

- Inter-connectivity of CB radio, WiFi, satellite.
- Communication applications Secricom Silentel on different platforms (Symbian, Android, Win Mobile, Windows).

The Secricom Silentel application for mobile and fixed devices allows to invite for cooperation more actors such as municipality members and regional governments.
